

Maxxfan Roof Flange Dimensions

Maxxfans were originally designed for the US RV market. The US standard roof opening is 14 x 14 inches or 35 x 35cm. Maxxfan redesigned the roof flanges to fit the European standard roof opening of 40 x 40cm. The main fan body remains the same size, it is just the roof flange and the internal garnish ring that are different sizes.

KI40 models = 40 x 40cm roof flange

KI models = 35 x 35cm roof flange
